** Vendor shall work with ordering agency on three custom fabricated brackets/console support systems. Brackets/console support structures shall be constructed of 3/16th aluminum and meet customer shape and measurement specifications. There are pictures below of the three brackets/console support systems.

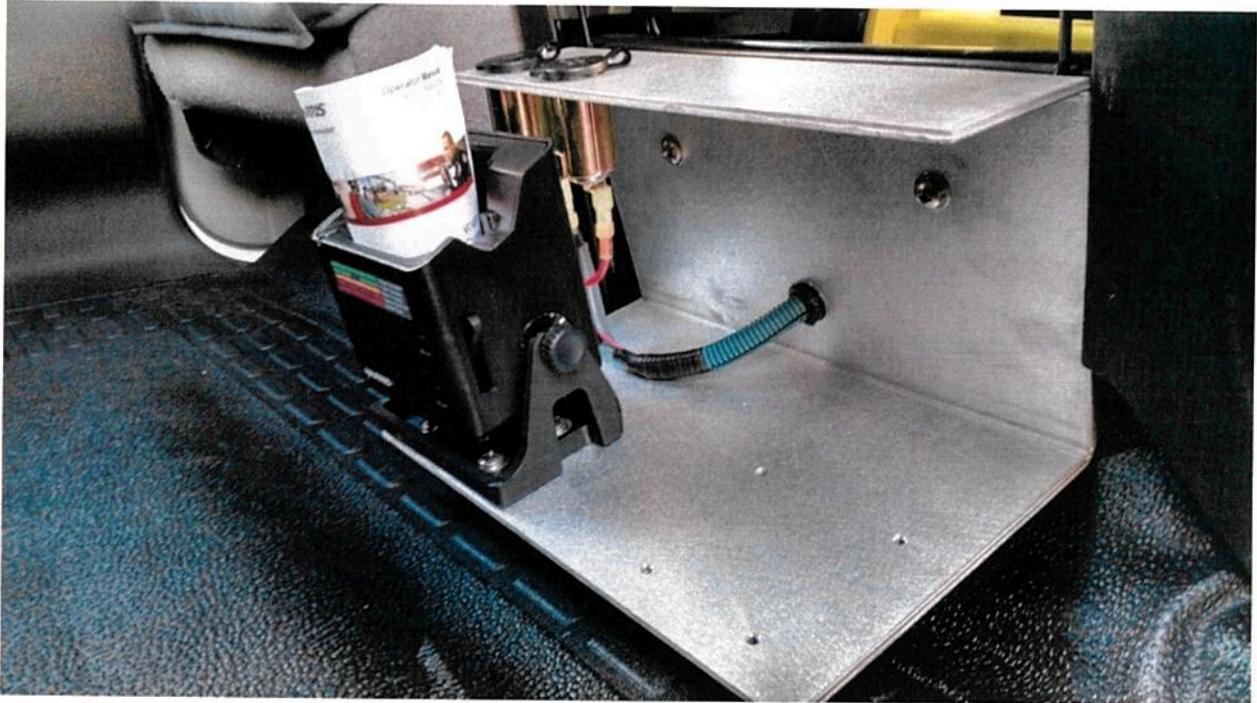

This is the front console support. Center seat section frame is left as support also.

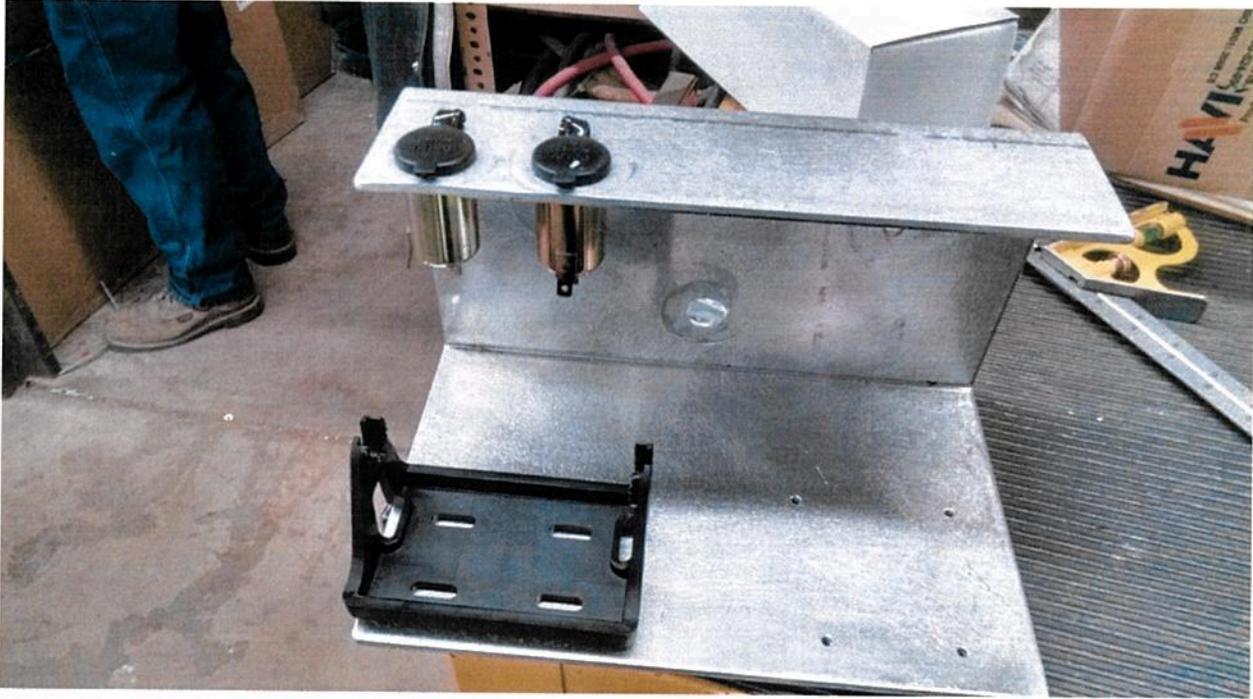

Rear bracket of console support, using seat frame bolts as anchor.

Both fronts and rear console supports prior to install

Rear bracket installed on back of center front seat frame. Picture only shows 2 lighter plugs, a third will be added.

Rear bracket prior to install, again a third lighter plug will be installed.
